Docket No.: H0595.0031/P031

AMENDMENTS TO THE CLAIMS

1. (Currently amended) A compound of Formula II below:

$$\begin{array}{c} OH \\ N \\ \hline \\ O \\ O \\ OR_1 \end{array}$$

wherein

 R_1 is a p-nitrobenzyl or p-methoxybenzyl group; and R_2 and R_3 may be identical to or different from each other and are each independently a $C_{1\sim 6}$ alkyl or aryl group, or a derivative thereof.

2. (Currently amended) A process for preparing a compound of Formula II below:

$$\begin{array}{c}
OH \\
N \\
N
\end{array}$$

$$\begin{array}{c}
R_2 \\
R_3
\end{array}$$

$$\begin{array}{c}
R_3 \\
\end{array}$$

wherein

 R_1 is a p-nitrobenzyl or p-methoxybenzyl group; and R_2 and R_3 may be identical to or different from each other and are each independently a $C_{1\sim 6}$ alkyl or aryl group, by coupling a compound of Formula IV below:

$$\begin{array}{c}
OH \\
O \\
O \\
O \\
OR_1
\end{array}$$
(IV)

wherein R_1 is a p-nitrobenzyl or p-methoxybenzyl group, or a derivative thereof, with 2-aminoethanethiol hydrochloride in the presence of a base, followed by reaction with a ketone.

- 3. (Original) The process according to claim 2, wherein the ketone is selected from the group consisting of acetone, methylethylketone, diphenylketone, and mixtures thereof.
- 4. (Currently amended) The process according to claim 2 or 3, wherein the compound of Formula IV or a derivative thereof is obtained by condensing a compound of Formula III below:

Application No. 10/563,250 Reply to Office Action of May 30, 2008

Docket No.: H0595.0031/P031

wherein

 R_1 is a p-nitrobenzyl or p-methoxybenzyl group, with diphenylchlorophosphate in the presence of a base.

- 5. (Original) The process according to claim 4, wherein the reaction solvent is a mixed solvent of acetonitrile and tetrahydrofuran.
- 6. (Currently amended) The process according to claim 4, wherein the reaction condensation is carried out at a temperature [[is]] within the range of 0°C to -10°C.
- 7. (Original) A process for preparing the compound of Formula I below:

Application No. 10/563,250 Reply to Office Action of May 30, 2008

by reacting a compound of formula II below:

$$\bigcap_{N \in \mathbb{N}} \bigcap_{N \in \mathbb{N}} \bigcap_{R_3} \bigcap_{N \in \mathbb{N}} \bigcap_{N \in \mathbb{N}}$$

wherein

 R_1 is a p-nitrobenzyl or p-methoxybenzyl group; and R_2 and R_3 may be identical to or different from each other and are each independently a $C_{1\sim 6}$ alkyl or aryl group, with isopropylformimidate or benzylformimidate in the presence of a base to obtain a compound of Formula V below:

Docket No.: H0595.0031/P031

wherein

R₁ is a p-nitrobenzyl or p-methoxybenzyl group, hydrogenating the compound of Formula V in the presence of a metal catalyst, separating the hydrogenated compound, and crystallizing the separated compound in the presence of an alcohol or ketone.

OR,

- 8. (Original) The process according to claim 7, wherein the hydrogenation is carried out in the presence of a palladium catalyst containing an excess of water under a hydrogen pressure of 4~6 kg/cm².
- 9. (Original) The process according to claim 7, wherein the reaction solvent is a mixed solvent of water and tetrahydrofuran.

Docket No.: H0595.0031/P031
